

CHAUNDA C. DALLAS, MSIT

Healthcare Cybersecurity Strategist

Clinical AI Safety · Medical Device & IoMT Risk · Clinical Downtime & Ransomware Readiness
connect@chaundacdallas.com · US-based, remote · linkedin.com/in/chaundacdallas · chaundacdallas.com

PROFESSIONAL SUMMARY

Healthcare cybersecurity strategist who assesses what cyber and AI failures do to patients. 28+ years in healthcare, including 23 years in emergency departments as Lead Emergency Department Technician, clinical preceptor and Epic Super User for 200+ clinicians at two Level II trauma centers, then clinical coordination for interventional radiology. Onboarded clinicians onto ambient AI documentation at DeepScribe. Creator of Patient-Side Threat Modeling (PSTM), which scores clinical AI and medical device risk by patient harm. Featured Defender in Semperis' *Midnight in the War Room* (Black Hat USA 2026; ~30-city international tour).

CORE COMPETENCIES

Clinical AI Risk Assessment · AI Red Teaming (OWASP LLM Top 10, MITRE ATLAS) · Ambient & Clinical AI Adoption · Medical Device & IoMT Security · Clinical Threat Modeling (PSTM) · FDA Premarket Cybersecurity Guidance · Clinical Downtime & Ransomware Readiness · Tabletop Exercise Design · Clinical Workflow & EHR (Epic) · Clinical-Technical Liaison · HIPAA Security Rule · NIST AI RMF

PROFESSIONAL EXPERIENCE

Founder & Principal

2022 – Present

Chaunda C. Dallas Consulting — Healthcare Cybersecurity, Clinical AI & IoMT

- Created Patient-Side Threat Modeling (PSTM), a framework that scores clinical AI and medical device risk by patient consequence: physiological dependency, latency to harm, bedside detectability, workaround pressure and downtime survivability.
- Built the DFR Lab: 9 IoMT failure scenarios and 3 clinical-AI red-team scenarios (prompt injection, PHI leakage, agentic chain attack), mapped to NIST CSF, HIPAA, FDA guidance, IEC 62443 and the OWASP LLM Top 10.
- Designed the 3 A.M. Downtime Drill, a clinical ransomware tabletop for ED and nursing leaders built on regional diversion-cascade dynamics.
- Publish healthcare ransomware threat intelligence: Healthcare Ransomware Intelligence Tracker and a Qilin/Agenda threat brief with MITRE ATT&CK mapping and PSTM scoring.
- Founding security engagement for a startup platform (Koalesce Studios / Desivity, Aug–Dec 2025): Zero Trust architecture, threat model, and SOC 2 Type I / ISO 27001 readiness frameworks.

Virtual CISO (vCISO) Advisor

Apr 2024 – Dec 2025

MyCyberIQ — early-stage healthcare cybersecurity platform

- Hired as CISO, then retained as vCISO advisor (420+ documented advisory hours): set security strategy, human-risk and awareness programs, and compliance-informed product direction.
- Designed role-based security content for clinical, operational and executive audiences; ran phishing-simulation strategy (KnowBe4) and advised on ransomware defense.

Customer Success Engineer — Clinical AI & EHR (Contract)

Dec 2021 – Mar 2022

DeepScribe — ambient AI medical documentation

- Onboarded and trained clinicians adopting ambient AI documentation across multi-site practices; configured workflows in athenahealth, Kareo and eClinicalWorks.
- Served as clinical-technical liaison between physicians, engineering and product, turning provider workflow friction into product fixes.

Lead Clinical Coordinator

Apr 2016 – Oct 2021

Azura Vascular Care — outpatient interventional radiology & vascular surgery

- Directed clinical operations across interventional radiology and surgical suites where documentation integrity directly affected patient outcomes.
- Managed all surgical referrals and payer authorizations for specialty IR cases (uterine fibroid embolization, peripheral arterial disease, hemorrhoid artery, varicocele and ovarian vein embolization).

Operations Manager & Cybersecurity Strategist

Jun 2023 – Apr 2024

HeartLove Place Ministries — Milwaukee, WI

- Detected and shut down a website-spoofing campaign targeting donations, preventing about \$30K in fraud; deployed SIEM monitoring and incident-response procedures.

Graduate Research Assistant — Wearable Health Technology

Jan – May 2020

Kennesaw State University

- Researched adoption, security and privacy risks, and ethical issues of wearable health technology for older adults. The project was paused by COVID-19; the research contributed to a faculty-published paper.

Lead Emergency Department Technician & Clinical Preceptor | Epic Super User

1999 – 2016

Piedmont Healthcare — Level II Trauma EDs: Eastside Medical Center (now Piedmont Eastside), Piedmont Atlanta

- Trusted with high autonomy in high-volume trauma EDs; coordinated operations during trauma activations, Code Blue events and mass-casualty responses.
- Selected as ER Epic Super User for Piedmont Atlanta's implementation: trained and supported 200+ clinicians through go-live, upgrades, downtime readiness and troubleshooting.
- Ran manual downtime protocols during EHR outages to keep patient care moving, the origin of the downtime-survivability work in PSTM.

Earlier: emergency department registration and referral coordination, including Emory Healthcare.

MENTORSHIP

- Technical Mentor, Women in CyberSecurity (WiCyS), May 2024 – Present: co-mentored 600+ learners across three grant-funded Google Cybersecurity Certificate cohorts.

RECOGNITION

- Featured Defender (one of 52), *Midnight in the War Room* (Semperis) — premiered Black Hat USA, Aug 2026; ~30-city international tour.
- Panelist, WiCyS 2026 Virtual Conference • Guest, Halcyon “Last Month in Security” podcast (Ep. 006).

EDUCATION & TRAINING

- M.S., Information Technology (Cybersecurity concentration) — Kennesaw State University
- Graduate Certificate, Healthcare Technology • B.S., Criminal Justice — Kennesaw State University
- MiC LEAD Builders Program — year-long SOC apprenticeship: Splunk alert triage, MITRE ATT&CK-mapped investigation, end-to-end ransomware incident simulation (2024–2025).
- In progress: Microsoft SC-900 (exam Oct 2026) • CompTIA SecAI+
